

## ELECTRONICS

You use your handheld and personal electronics constantly, making them a breeding ground for germs. Daily, they are passed from person to person and come in contact with seemingly clean surfaces that are in reality covered in harmful microbes. Disinfect and protect your electronics safely with our line of Microbe Free Solutions' products.

### Sanitizer + Disinfectant

- NSF Registered (D-2) "No rinse required on food contact surfaces"
- Fresh Start is EPA registered and approved for use against SARS-CoV-2, the virus that causes COVID-19
- Fresh Start kills 99.9% of bacteria, germs, mold, mildew, and viruses
- Fresh Start is a category four rating (Very Low Toxicity) on the EPA Toxicology system - one of the safest products available
- Disinfection achieved after 10 minute dwell time

### Preservative Protectant

- Xmicrobe is an EPA Registered patented waterbased antimicrobial technology
- Xmicrobe creates a biostatic surface that controls and rapidly destroys odor-causing germs, bacteria, mold, mildew, fungi, and algae by first piercing via its positive attraction and then electrocuting
- Xmicrobe remains active on treated hard and soft surfaces, 24/7, providing unsurpassed durability
- Easy to apply and leaves the surface easier to clean
- Industry's highest safety rating

Fresh Start and Xmicrobe are environmentally friendly, VOC and CFC free, & Hypergreen MFS has a proven track record of antimicrobial success for over 30 years

### We Set and Are The Industry Standard for Antimicrobial Protection.

**Fresh Start** is a versatile workhorse cleaner boasting EPA Registration in all 50 states, Washington DC, and Canada, approved on both hard and soft surfaces with one of the highest safety ratings on the EPA Toxicology System, making it one of the safest food-grade **Hypergreen** products available.

**Xmicrobe** is a virtually permanent world class, industry leading EPA Registered **Hypergreen** preservative protectant coating. Covalently bonding to both hard and soft surfaces, it works continuously to destroy odorcausing bacteria, germs, mold, mildew, fungi, and algae.

**Easy to Apply.** Simply spray, wipe, or fog on to ensure coverage over vast areas of hard to reach surfaces and high tough areas.

**Environmentally Safe.** Our **Hypergreen** products do not release harmful chemicals into the earth, air, or ozone, making this product one of the safest for you and the environment with its category four rating on the EPA Toxicology system.

NW Microbe Free Solutions' products are here to protect your investment, keeping harmful bacteria, viruses, and other harmful germs away. Disinfect and protect with Microbe Free Solutions' products, giving you lasting peace of mind

# Frequently Asked Questions

### What all can I sanitize and disinfect with Fresh Start?

You can sanitize and disinfect with Fresh Start on most hard and soft surfaces including phones, laptops, computers, control panels, screens, remotes, fabric laptop and phone cases, and much more. Fresh Start is effective for up to 4 weeks after treatment to kill odor-causing germs, bacteria, mold, and mildew. High touch surfaces like phones and keyboards should be treated more often. Fresh Start can replace your current daily sanitization products.

### What all can I protect with Xmicrobe?

You can protect most hard and soft surfaces with Xmicrobe like phones, laptops, computers, control panels, screens, remotes, fabric laptop and phone cases, and much more. Xmicrobe covalently bonds to the surface creating a virtually permanent protection for as long as the surface is intact.

### Is Fresh Start safe?

Fresh Start has a very low toxicity and is one of the safest products available.

### Can I use these products on my fabric laptop case?

Yes, our products, Fresh Start and Xmicrobe, treat and protect and are safe to use on both hard and soft surfaces. It will not leave a residue or staining on fabrics.

### Does it affect the touch screen?

No, Fresh Start does not leave a residue or film on the screen and dries clear.

### What is the process for treating my personal electronics?

Spray Fresh Start on a microfiber towel and wipe down your electronics, including screens, keyboards, mice, making sure to pay extra attention to the highest touched surfaces and your most shared items. Then, Xmicrobe, our preservative protectant product, will be applied in the same way. For future touch up, spray Fresh Start on a microfiber towel and wipe down any high touch surfaces or shared items like phones and keypads.
